

Now I title this: "Blogs for my Future domain"

When each year passes, I sometimes think about my past actions, and I'm like why tf did I do that? It's almost as if I gained consciousness just yesterday.

Recently, I realized it's mostly likely because my brain is still developing its prefrontal cortex!!! This is probably normal for everyone lol Also, remember the depressed phase I had last spring/summer? Again, it's because I'm a teenager. It's all starting to click now. It's also a reason why I don't have a lot of patience probably. Honestly, I just really want to lose weight. I'm hoping 5 lbs down by end of December. From now on, I'm not eating when I come home from school. I will take a nap and then eat, slowly.

It occurred to me that literally everyone lies on apps, so basically LOR's and essay are top priority.

Also awards/honors. Like BoA and USAPhO qualifier. It's just that do I even apply to any longterm camps as a sophomore if I need to grind physics? Like shorter camps are fun for vacation and shit, but the long ones can get tedious. Especially because I'm ^{not} gonna draft some half-assed research paper for college. I'm not even that interested. Though, I think AAJA is worth applying to bc I'd definitely like to improve my writing skills :) + it's only a week long. Okay also...

I basically planned out my entire sr year / plan for hs. I apply for CPS & get in. Then QB, and become a finalist. Then I rank like MIT + T20's and get accepted!!! So, in order to not seem sus, we record the reaction, but not the computer tab. Then, on the X colleges decision date, we post on Wechat! Noice bruh. That'd literally be perfect. Can't forget to apply to fly-in's + more summer programs, like uhh idk man.

Also, I need to be more nonchalant like when Aanya was talking about Dan applying to RSI, idk why I

got mad? like bro he can do what he wants — even if it's a waste of time. I don't think he stands out very much, do he has no sports and seems socially inept I can't lie. He also doesn't seem smart enough for MIT/Caltech which like the geeks. So yeah, moral of the story: Nonchalant.

Honestly, I'm done yapping b/c there is not much else to talk about!

Talk to you later,

My Dream of the Next Two Years

My Sophomore Year:

- USAPho Qualifier
- USACO Silver
- Jcamp, ISPEED, AI ~~II~~ All Acceptance
- AEA Acceptance
- PA Legion Win
- PA STEM Top 20
- Eisenberg, UChig Acceptance
- 50 videos on yt channel
- 50 in Summer
- 115 lbs

My Junior Year:

- USAPho Gold
- USACO Gold
- CPS, LEDA, YGS, SAMS, PGSS Acceptance
- ARC STEM Acceptance
- NWIT Award
- ~~G~~ GIT Girl Award
- 100 vids on yt + Summer
- Okay... really want a paid program
- Oh yeah BDA
- That CCAC Thing
- ABAP

My Senior Year:

- NCM Finalist (Matched etc)
- Fly-ins (a lot)
- SPARC
- Job (money)
- Cruise
- Insta updates
- 100 vids yt
- list for collage
- China trip assesses

Man: Right now I just want
my ISPEED / JCamp / PA Legion / PA
STEM / AEA / AI4All / Uchi / USAPHO

Imao. seems doable honestly.

I should shoot my shot because
50% / 50% chance right? yes or no.

With lots of Love,
Clair

P.S. Forgot Littlebird.

My Group for STEM doesn't really do much. I have to do like 10x more work than everyone else. This is why I want to focus on USAPho + getting accepted into summer programs. If my group doesn't say anything in the gc, then I'm not going to either b/c WTF. I need to work on other things as well da fuq. It was honestly so weird that Pearl joined again after she said she had to go. Like bruh. But yeah, mostly have to do PA Legion. I think for Jcamp I want to submit my PA Legion + Liligi Mangione + a (software dev/personal) blog. I also have to think of a video idea, and actually read the prompts. If I don't complete PA Legion, I really don't want to ask Hackworth for a LOR. Maybe I should ask the superintendent for one. OFC did a brag sheet + specifically my ability to speak about issues in a diplomatic manner and to decision-making adults. I'm →

going to complete the Physics Book within
2 days — bc I'll get 8-12
done today easily. ☺

P.S. Also, I don't want to
focus on YouTube rn until after
USACO/USApho season. Because
*ask my brain for the obvious
reason*

Bruh today I feel shitty for
no reason. I'm just going to sleep
it off; must be hormones.

Bests Clair,
lots of Love, Jockey, Thing 2,

I'm kind of mad I didn't start
my apps. Also feel like I'm going
to fail F=ma. Other than that
I am growing stronger and
improving each day 😊 Decent
weekend, very relaxing. I love
my family and nice house.
Georgia v. is my role model
honestly. Her love and happiness
is inspiring.

1/26/25

I managed to get 10/11 on $F=ma$,
I'm increasing at least. The reason
why score can accurately show
my progress is because I used
to get 8 for 2013 or smth.
I need to finish all current
tests and then move to mocks.
After doing mocks I need to do
current tests again. I also need
to do the book if possible in
five constraints. I'm proud of
myself for successfully stopping
my phone / dopamine addiction.
Lol, hannah's status was "give up"
and her about me was tai nan le.
Fuck just realized I forgot how to
write chinese. My dumb ass self.
Anyways, wonder what she's
talking about, at best it's
USACO or smth, not $F=ma$...
because well. More competition.
But she might bring down the
arg. idk. Good night!

Love Dad,

2/23/25

Currently, I'm struggling with internet addiction, and I need to go through a dopamine detox. I literally can't go any where without my phone, and I must watch Youtube to do work. This is terrible. Starting today, I'm going to block YT on reddit off my phone and computer. Also, my eyes have gotten worse. I thought lack of sleep was the issue, but clearly not. I can NEVER start off the day with a phone.

Love you, Jockey, Thing 2, Wilf, Jay feather, Mongoose, Littlebird, Thing 1, and Littlebird Sir Hazel + Bucky. HM: Furpie + Teehno

3/2/25

So, I initially wasn't going to write today, but I have too many thoughts that are preventing me from sleeping. lol. First, I was recently accepted into AEA! It's just sad that I can't rant about it to anyone b/c my mom is sick of hearing abt it probably, and I can't tell friends b/c duh (flexing). Anyways, this year has been going oddly well for me. I think ever since I cut out YT, tiktok, snap, it's improved my mental health and overall productivity so much. You always win some and lose some however. I'm decently sure I failed $F=MA$ (<5) and also my chem grade is a 92. Not to worry though, I still have half a quarter left, and I can take the AP Physics 1 exam to prove myself, I'm seriously going to stop watching my phone during freetime. Even zoning out would be better. I also need to delete reddit off my phone, and

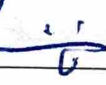

I need to block YT and
mangatoto off Safari. I
realized I would watch YT
on Safari. Which is even worse
than on the app b/c it kills
my eyes with the shitty
quality. Next, I'm going to
ask Ansh & Anya if we can
be on the same team for
STEM (all clad). I'm scared
dad's going to walk in and
bust me. That'll be embarrassing
so I'm going to pre-emptively
stop writing 🙊

Love you so much,
Jockey, Thing 2, Wild, Jayfeather,
Mongoose, Littlebird, Thing 1,
Littlebird Sr., and Hazelnut.

+ Familyyyyyy lol

3/17/25

I'm pretty happy this week, maybe it's because I'm ovulating? Idk. Anyways, I was accepted NHS! Apparently, Tvesha is President, did Dan not apply or sum lol. Also, I AM doing CGI App Challenge, only because Pearl agreed to carry me lowkey. I was feeling this "summer scares" earlier this week (if you're me you'll know what I'm referring to), but it went away. Maybe sleep deprived = no summer scares? Oh also, I was doing a USACO problem, and I just thought the solution was just so clean and novel, so I wanted to reiterate it here:

basically, you store start + end into 2 different arrays. Then, you loop through a new array [1000]; for each start - end, plus 1 in the new array index. That's how you get the counts. Then, easily see which ones would have the most unchanged if removing a life guard. Dude the solution

was so good it lowk made me
cream. like. OK and I was
thinking, my channel can be
like highschooler in US experiencing
so much fun activities + college
maxxing. But don't explicitly say
that, just tease it. I'll be like
Konna Bae but long form + more
studying lmao. Also, I got a (6)
in F=ma, idk how to feel,
not great but not as bad
as I thought (recall the <5)
lol. I'm getting tired of
writing so gn. 

Love you lots,

okay, so, I'm writing this b/c I can't sleep. There's a lot going through my head. First, why am I so THIRSTY? Hardik ain't even cute, like. Hello. So is Aditya. Also, Shaurya's brother is ugly ash. Bro also how come both of them didn't respond to the text. Bozos. SO DID SHIRITA! Rude but I feel bad, she's cooked. I fr thought she was doing it for sure. I hope Aditya stops helping her. We highkey need him. My hand is tired now, so I'm gonna stop.

Love you Lots,

Jockey, Thing 2, Wild, Jayfeather,
Mongoose, Littlebird, Thing 1,
Littlebird Sr., and Hazelnut.

Also family freaking duh 

4/6/20 11:30PM

I'm writing this b/c I can't sleep.
For vids:

- ① 3/17 → change thumbnail, edit title, montage
reupload
- ② vb shorts → check if comments are
ok, if not reupload
- ③ make fashion(?) vid → bedazzle clips,
wash tide stain, new bra, cut pants,
cut jersey
- ④ make study vid → explain todo, offer
timing, don't make long, google
home
- ⑤ OOTD → talk plan while doing makeup,
only 3 days
- ⑥ How I stay fit → exercise, vb, food
- ⑦ PA STEM vlog → ez
- ⑧ PA STEM shorts → "Outside" ^{either} or "Imagine
if I didn't win but goes south"

For thumbnails, do one pic, add date overlay, and emojis.

Montage → music

vlog → ydy no music dah

cover → my music

week of life → no music

guitar cover → 学猫叫, Both sides

Now, can we do this after
APs + finals?

imo record these, but don't edit

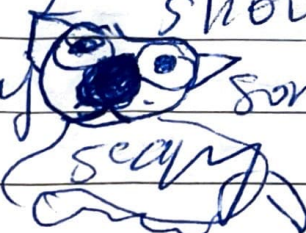

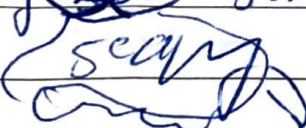

Tourney OVR → teams (pool/budget)
explanation, food, tiktoks, jersey,
travel, whats in my bag, coffee

Order: 1. 3/17, 2. vb shorts, 3. study, 4. guitar,
5. ODTB, 6. PA STEM vt shorts, 7. OVR, 8. fit,
9. fashion

It's actually really fun to post vids
b/c I've never done it that
much except COVID tiktok ig.
Being a creator is fun b/c I

like watching myself be cool.
Also, I have a new plan. to
start a wake in afternoon.

Mon:	Tue	Wed	Thur:	Fri:
coffee	20 min	run	20 min	coffee
20 min nap	nap	shower	nap	20 min
wk out	wk out	wk out	wk out	nap
				wk out

If I stick to this, I should be
successful, hope fully  sorry, smiley
looks a find 

o o sk

hello

4/19/25

Just did a long ass rant
about STEM. But ended up
being productive so I ripped
it out. ~~ME~~ deeply got
FFJ. on graded assignments
+ test is +mr. lowk cooked
with moment be like

Low you,
Jockey, Thing 2, Wild, Jayfeather,
Mongoose, Thing 1, Littlebird,
Littlebird Sr., and Hazelnut

4/20/25

I haven't really discussed / thought about my goals for awhile, at least since end of March...

1. Mentally

I hope to not care what others think in volleyball and just enjoy my time doing exercise. I can always talk to Lizzie or others! I need to write affirmations → just did lol.

2. Physically

I hope to be able to do 1 pull-ups. I'de about weight anymore. Too much work. Though I will say more water!!!

3. Academically

Study hard for Aps
Study hard for Physics
Get better about writing
Not so... Straightforwardly?

4. Socially
Create YT vids 1x every one
or two weeks?

That's all!

Love you, Jockey, Thing 2,
Wild, Jayfeather, Mongoose,
~~Watching~~ I, Littlebird SR, and
Hazelnut + Booby
HM: Turpie & Techno ♡

P.S. Isn't my mental health
so much better?

Combination: more sleep + less
stress + mature/wise + less
hormones
